### HG系列混凝土布料机

HG Series of concrete placing boom

1989年,中联重科研究开发出我国第一台全液压混凝土布料机。十几年来,中联重科不断完善、创新,形成今天国内最全的HG系列混凝土布料机。根据施工环境和客户要求,可个性化设计内爬式、行走式、船载式、手动式等多种机型。

In 1989 ZOOMLION researched and developed Chinese first hydraulic concrete placing boom which raised the concrete construction technique to a new level. For the late ten years, together with the fast development of construction in China, ZOOMLION has blazed a trail to complete HG series of concrete placing booms. The placing radii are 10-38m, with various types and sizes. According to the user's requirement, lots of types may be designed, such as climbing type, movable type, barge type, manual type, etc. They are widely used in the construction of electricity, communication, hydraulic power station, industry, civil engineering, etc.
